FEBRUARY 1994

INTELLIGENT SYSTEMS & THEIR APPLICATIONS

EXPERT

ANNUAL INDEX, VOLUME 9, 1994

Articles

AI at Work (CAIA '93)

"Incorporating Probabilistic Reasoning in a Reactive Program," Lisa J. Burnell and Scott Talbot, February, pp. 15–20.

"A Machine-Learning Apprentice for the Completion of Repetitive Forms," Leonard A. Hermens and Jeffrey C. Schlimmer, February, pp. 28–33.

"Massively Parallel Support for Case-Based Planning," Brian P. Kettler, James A. Hendler, William A. Andersen, and Matthew P. Evett, February, pp. 8–14.

"AI-Based Planning for Data Analysis," Amy L. Lansky and Andrew G. Philpot, February, pp. 21–27.

AI in Corporate Service and Support

"Delivering Marketing Expertise to the Front Lines," Clayton Stafford and Johannes de Haan, April, pp. 23–32.

"Automated Assignment and Scheduling of Service Personnel," John E. Collins and Elizabeth M. Sisley, April, pp. 33–39.

AI in Molecular Biology

"A Hybrid Algorithm for Determining Protein Structure," Xiru Zhang, August, pp. 66–74.

"Machine Learning Approaches to Gene Recognition," Mark W. Craven and Jude W. Shavlik, April, pp. 2–10.

"Representing, Analyzing, and Synthesizing Biochemical Pathways," Peter D. Karp and Michael L. Mavrovouniotis, April, pp. 11–21.

ARPA Strategic Computing Initiative

"Toward Systems that Understand Spoken Language," Victor W. Zue, February, pp. 51–59.

Embedded AI

"Embedded AI: Guest Editor's Introduction," Fred Highland, June, pp. 18–20.

"Embedding Neural Nets and Expert Systems in Diagnostic Microbiology Laboratories," Victor Ciesielski and John Spicer, June, pp. 42–48.

"An Expert System Shell for Aerospace Applications," Bandreddi E. Prasad, Tolety Siva Perraju, Garimella Uma, and Pasuparthy Umarani, August, pp. 56–64.

"An Intelligent Symbol Usage Assistant for CAD Systems," DerShung Yang, James H. Garrett, Jr., Doris S. Shaw, and Larry A. Rendell, June, pp. 32–41.

"Real–Time Knowledge-Based Support for Air Traffic Management," Urs Schlatter, June, pp. 21–24.

"Smarter Computer-Aided Design," Kenneth F. Reinschmidt and Gavin Finn, August, pp. 50–55.

"Using Functional Maintenance to Improve Fault Tolerance," Yasushi Umeda, Tetsuo Tomiyama, Hiroyuki Yoshikawa, and Yoshiki Shimomura, June, pp. 25–31.

"Validating an Embedded Intelligent Sensor Control System," Patrick R. Harrison and P. Ann Harrison, June, pp. 49–53.

Fuzzy Logic

"A Better Path to Duplicating Human Reasoning," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Christopher J.S. deSilva and Yianni Attikiouzel, August, p. 14.

"Broader Issues at Stake," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," B. Chandrasekaran, August, pp. 10–13.

"Elkan Goes Wrong — Again," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," George J. Klir and Bo Yuan, August, pp. 25–26.

"Fuzzy Control: A Misconception of Theory and Application," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," E.H. Mamdani, August, pp. 27–28.

"Fuzzy Logic: An Interface Between Logic and Human Reasoning," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Christian Freksa, August, pp. 20–21.

"Fuzzy Logic: A Misplaced Appeal," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Francis Jeffry Pelletier, August, pp. 29–31.

"A Fuzzy Logic Symposium: Guest Editor's Introduction," Lokendra Shastri, August, p. 2.

"Known Concerns About Fuzzy Logic," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Oscar N. Garcia, August, pp. 22–24.

"Misrepresentations and Challenges," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Ronald R. Yager, August, pp. 41–42.

"On the Purportedly Paradoxical Nature of Fuzzy Logic," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Enrique H. Ruspini, August, pp. 32–33.

"The Paradoxical Controversy over Fuzzy Logic," reply to respondents, Charles Elkan, August, pp. 47–49.

"The Paradoxical Success of Fuzzy Logic," Charles Elkan, August, pp. 3–8.

"Partial Truth is Not Uncertainty: Fuzzy Logic versus Possibilistic Logic," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Didier Dubois, Henri Prade, and Philippe Smets, August, pp. 15–19.

"The Promising Future of Fuzzy Logic," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Nader Vadiee and Mohammad Jamshidi, August, pp. 36–38.

"Semantic Uncertainty of the Fuzzified Laws of Logic," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Burhan Turksen, August, pp. 34–35.

"Toward a Framework for Fuzzy Dynamic Systems," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Pei-Zhuang Wang, Sie-Keng Tan, and Shaohua Tan, August, pp. 39–40.

"The Unique Strength of Fuzzy Logic Control," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Hamid R. Berenji, August, p. 9.

"Why the Success of Fuzzy Logic is not Paradoxical," a response to Charles Elkan's "The Paradoxical Success of Fuzzy Logic," Lotfi Zadeh, August, pp. 43–46.

Knowledge-Based Software Engineering

"CommonKADS: A Comprehensive Methodology for KBS Development," Guus Schreiber, Bob Wielinga, Robert de Hoog, Hans Akkermans, Walter Van de Velde, December, pp. 28–37.

"Representing and Maintaining Process Knowledge for Large-Scale Systems Development," Balasubramaiam Ramesh and Vasant Dhar, April, pp. 54–59.

Machine Learning

"Machine Learning Approaches to Gene Recognition," Mark W. Craven and Jude W. Shavlik, April, pp. 2–10.

"Overcoming Process Delays with Decision Tree Induction," Bob Evans and Doug Fisher, February, pp. 60–66.

Natural-Language Processing

"Applying Parallel Processing to Natural-Language Processing," Minhwa Chung and Dan Moldovan, February, pp. 36–44.

"Natural Language in Multimodal Human-Computer Interfaces," Olivero Stock, April, pp. 40–44.

"Natural-Language Processing: Guest Editors' Introduction," Terry Patten and Paul Jacobs, February, p. 35.

"Spoken Variable Initiative Dialog: An Adaptable Natural-Language Interface," Ronnie W. Smith, February, pp. 45–50.

"Using Natural-Language Processing to Produce Weather Forecasts," Eli Goldberg, Norbert Driedger, and Richard I. Kitteredge, April, pp. 45–53.

Navigation

"Multistrategy Adaptive Path Planning," Ashok K. Goel, Khaled S. Ali, Michael W. Donnellan, Andres Gomez de Silva Garza, and Todd J. Callantine, December, pp. 57–65.

Special Features

"Expert Prediction, Symbolic Learning, and Neural Networks: An Experiment in Greyhound Racing," Hsinchun Chen, Peter Buntin Finde, Linlin She, Diunie Sutjahjo, Chris Sommer, and Daryl Neely, December, pp. 21–27.

"A Hybrid Approach for Address Normalization with Spelling Correction Capability," Wing Shing Wong and Mooi Choo Chuah, December, pp. 38–45.

"The Role of Explanatory Relationships in Strategies for Abduction," Michael C. Tanner and John R. Josephson, June, pp. 54–59.

"Sowat: Sequence Optimizer for Wastewater Treatment," Srinivas Krovvidy, William G. Wee, Makram Suidan, R.S. Summers, John J. Coleman, and Lewis Rossman, December, pp. 15–20.

"Using Analogical Reasoning for Mechanism Design," Ghassan Issa, Stewart Shen, and Meng Sang Chew, June, pp. 60–69.

"Using Truth Maintenance Systems: A Tutorial," Mladen Stanojević, Sanja Vranеš, Dušan Velašević, December, pp. 46–56.

Validation and Verification

"Validating an Embedded Intelligent Sensor Control System," Patrick R. Harrison and P. Ann Harrison, June, pp. 49–53.

Departments

Conferences

"1993 International Joint Conference on AI," K.S.R. Anjaneyulu, February, pp. 69–71.

"Building and Sharing of Very Large Scale Knowledge Bases," (KBKS '93), James A. Hendler, August, p. 76.

"Intelligent Robotics in Field, Factory, Service, and Space," (AIAA/NASA Conference), Jon D. Erickson, April, p. 61.

"The Second World Congress on Expert Systems," Jay Liebowitz, April, p. 62.

Forum

"The Impact of Periodicals on Expert Systems Research," Chun Hung Cheng, Clyde W. Holsapple, and Anita Lee, December, pp. 7–14.

"Sharing and Reusing Rules: A Feature Comparison of Five Expert Systems Shells," Verlyn M. Johnson and John V. Carlis, June, pp. 3–17.

News

"Aerial Robots Still Having Trouble Getting Off the Ground," April, p. 60.

"American to Improve its Smarts," February, p. 68.

"Business Applications Honored at IAAI '94," August, p. 75.

"Carnegie Mellon Receives Mobile Robotics Grant," April, p. 60.

"Deep Thought Survives Storm, Claims Crown," August, p. 75.

"Developers of Modeling Technique Honored," (Charles Peskin & David McQueen of NYU), June, p. 70.

"Feigenbaum, Reddy to Receive Turing Award," December, p. 66.

"Humans Checkmate Computers," February, p. 68.

"Institute to Advance Union of Health Care and Technology," June, p. 70.

"Intel, Nestor to Market Neural Chip," February, p. 68.

"Neural Networks Join Fight Against Breast Cancer," August, p. 75.

"NSF Funds Neuromorphic Systems Center," December, p. 67.

"Parallel Processing Planned for PCs," February, p. 67.

"Pattern Recognition Pioneer Satosi Watanabe Dies," February, p. 68.

"Product Builds, Analyzes KBS," February, p. 68.

"Researcher Accomplishes Molecular-Level Computation," December, p. 66–67.

"Smart Intersections Halt Traffic Congestion," June, p. 71.

"Telerobot Handles the Hazard of Buried Waste," June, p. 70.

"A Three-Time Winner for Loebner Prize," February, p. 67.

"Worldwide AI Expenditures Hit $1 Billion," April, p. 60.

Reviews, Book

Artificial Intelligence Research in Manufacturing, Stephen J. Buckley, February, p. 75.

Second-Generation Expert Systems, Hiroshi Motoda, April, pp. 66–76.

Robot Evolution: The Development of Anthrobotics, David P. Miller, December, pp. 71–72.

Qualitative Reasoning: Modeling and Simulation with Incomplete Knowledge, Ernest Davis, December, pp. 70–71.

World

"Beyond the Fifth Generation: Parallel AI Research in Japan," James Hendler, February, pp. 2–7.
